ABOUT MILLIMETRE

*"Ofcourse design is about problem solving,
but I cannot resist adding something personal."*
-Win Crouwel

Design excellence is not about more - it is about intention. Millimetre was conceived from a simple idea: make choices easier, design smarter, and set a new benchmark for decorative surfaces. What began as a subtle innovation in edge surfaces evolved into Texture On Your Edge (T.O.Y.E) - a thought-through disruption rather than a decorative embellishment.

Millimetre is a design-led surface brand shaped by precision, purpose, and responsibility. Guided by global sensibilities and an acute understanding of how designers think, we simplify material selection through clarity, consistency, and meticulous detail.

Rather than offering standalone laminates, we curate complete surface expressions - where colour, texture, and finish work seamlessly together to elevate furniture and interior design.

Because in design, Every Millimetre Counts.

WHAT DEFINES US

Customer-Centric Approach

Design begins with people.

At Millimetre, we design from real needs - not trends.

We simplify choice through clear curation, intuitive systems, and resolved surface solutions. By aligning materials, finishes, and detailing, we help designers translate intent into refined, precise, and beautifully finished furniture and interiors.

Thoughtful Curation

Less, but better.

We prioritise relevance over volume. Each collection is intentionally limited, tonally organised, and designed for contemporary moodboard-led workflows. Every surface has a purpose, every choice has meaning - nothing is incidental.

Design Excellence

Restraint over novelty.

Our decors are selected for tonal harmony, material expression, and versatility across design moods. Through disciplined curation of proportion, texture, and finish, we create surfaces that feel contemporary, timeless, and globally aligned.

Design for us is a composed system - not decoration.

Complete Surface-to-Edge™ Solution

Design is judged at the edge.

Millimetre delivers integrated surface systems where colour, texture, and edges work in seamless alignment. This consistency across every visible and tactile detail ensures furniture and interiors achieve a refined, resolved, and professional finish.

PHILOSOPHY

There was a time when creation carried soul.
Materials were honoured. Craft was intentional.
Every object, space, and surface had presence.

Today, much of this depth has been replaced by speed,
scale, and sameness. Spaces function - but often feel
hollow.

We believe this can change.
When design is guided by attention, integrity, and
respect for material, making becomes care.
Beauty becomes meaning. Craft becomes connection.

At Millimetre, every surface matters.
Every detail carries intention. Every choice has impact.
Because when creation is infused with heart, it doesn't
just shape spaces - it elevates life.

This is the energy we create with.
This is the responsibility we embrace.

This is how we Lead Change.

TEXTILES

Textiles presents a globally curated collection of textile-inspired surfaces, sourced from leading international design houses and introduced as a new material expression.

Each decor is selected for its refined structure, tonal sophistication, and ability to integrate seamlessly with solids, woods & metallics. Designed to work across furniture, panels, and interior applications, the collection supports contemporary design language with clarity and control.

Textiles enables furniture design that is consistent, cohesive, and considered from every angle.

WOODS

The wood collection has been carefully curated to respond to different design requirements through distinct colour moods - from light and airy naturals to warm mid-tones, deep dark woods, greyed and aged expressions.

Rather than grouping surfaces by species, the collection is organised by visual temperature and mood, allowing designers to select wood tones based on the atmosphere they wish to create - calm, warm, grounded, contemporary, or expressive.

Each décor balances authenticity of grain with controlled design, offering versatility across living & working spaces.

METALLICS

Metallics is a focused collection of metal inspired surfaces, developed to bring depth and character through refined texture rather than visual excess.

Featuring brushed and patterned metal expressions across a controlled palette, the collection balances tactility with clarity and restraint.

Designed for selective use, Metallics adds strength and distinction to furniture and interior applications - where detail, finish, and material presence are essential to the overall design intent.

Metallics introduces definition through surface and structure. Its presence is precise, deliberate, and inherently contemporary.

SOLIDS

Solids is a carefully curated chromatic colours collection, developed to support contemporary furniture and interior applications with restraint and precision.

With 23 decors across 50 SKUs, the range offers versatility without excess, enabling designers to work confidently across different moods and material combinations. Solids ensures visual continuity and precision in every detail.

Organised by colour tone and designed to integrate seamlessly with woods, textiles and metallics, solids provide a consistent, refined base for thoughtful design expression.

Collezione Essentia explores what is truly necessary in design - not excess, not repetition, but clarity, purpose, and restraint.

Developed through thoughtful curation, the collection brings together materials, textures, and colours that align with contemporary design workflows. Organised by tonal families and refined through material expression, Essentia offers versatility without overwhelming choice.

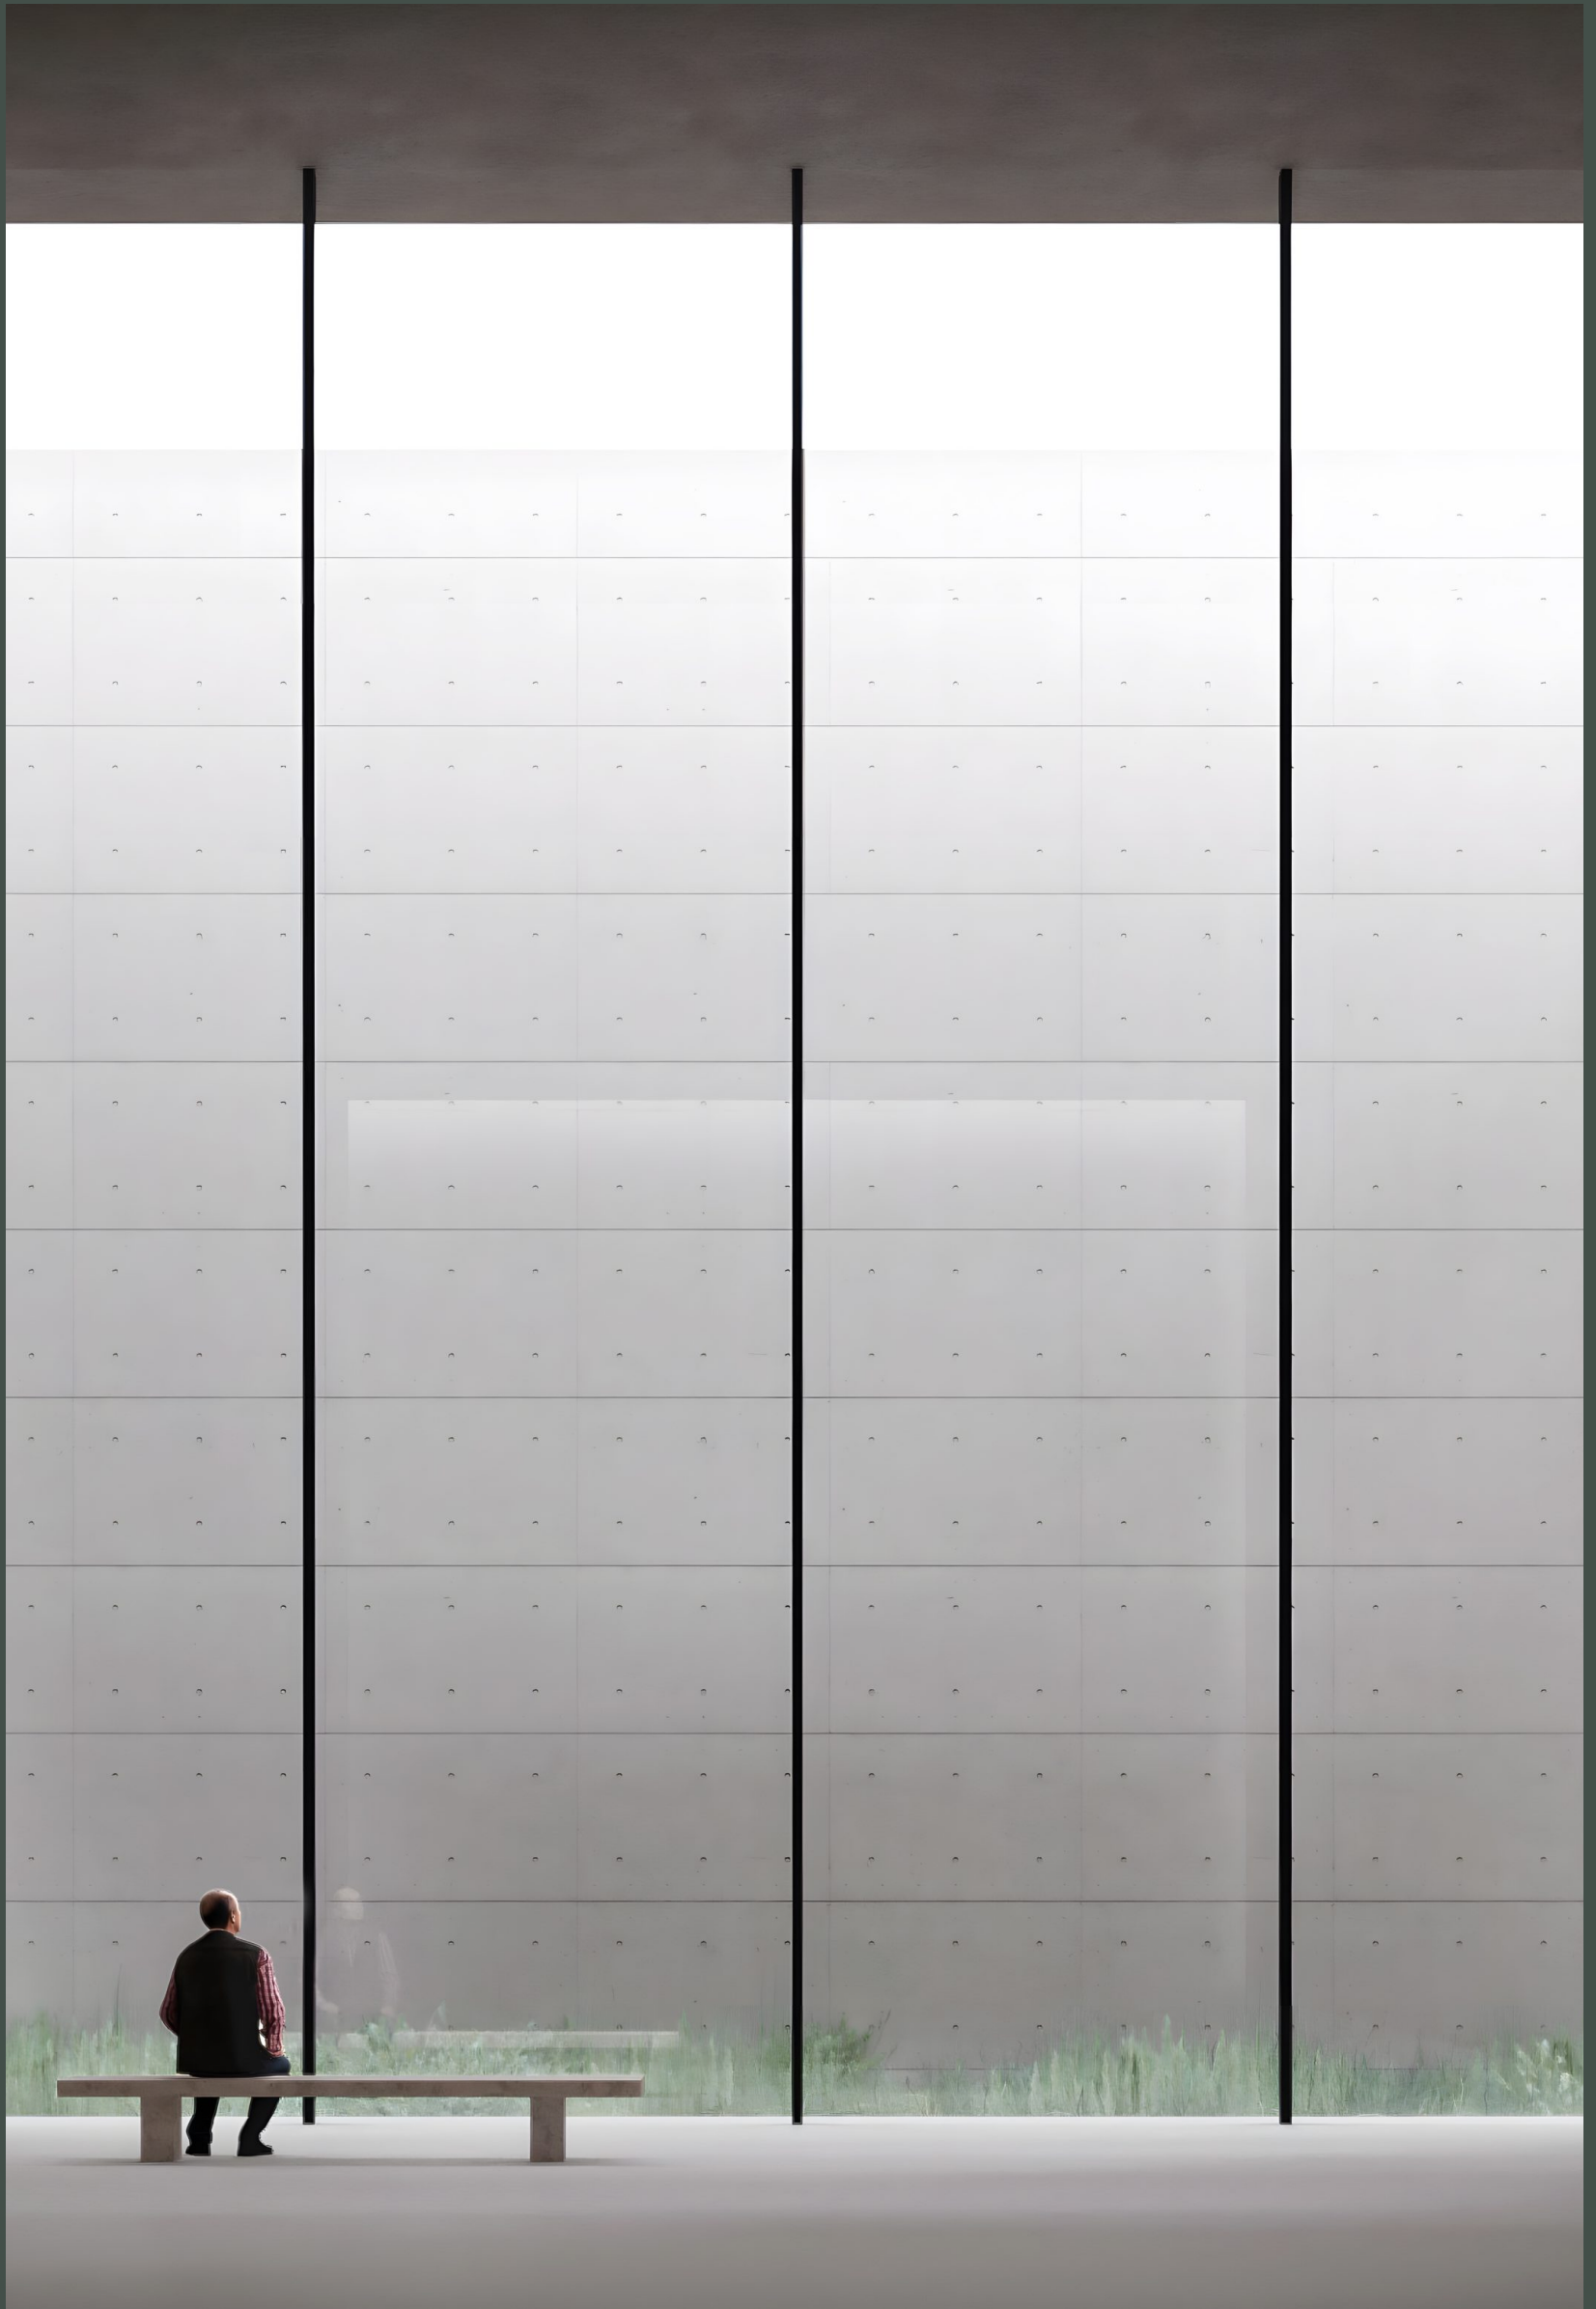

Each surface is designed to work seamlessly across furniture and interiors - ensuring harmony, consistency, and precision from concept to execution.

Because design becomes stronger when it is intentional.

When every choice has meaning. When the essential is enough. When **Every Millimetre Counts.**

LIFE - ESSENTIALS,
SHAPED THROUGH SURFACES.

SPACES ARE SHAPED
BY THE MATERIALS THAT
DEFINE THEM.

SOLIDS

MASTER ENTWINE: ME

Master Entwine brings a subtle, textile - inspired tactility to solid colours. The finish softly diffuses light, adding depth and warmth while maintaining a disciplined, architectural surface.

Fine fabric-like nuances make the surface feel composed yet inviting - contemporary, refined, and enduring. Each decor is curated as a versatile design base that supports moodboards with clarity while introducing a quiet tactile richness.

Specially manufactured to provide the industry’s best functional and aesthetic solution, Millimetre introduces BandEdge- For a higher quality finish, it is a legitimate completion to the process of building stylish and graceful furniture. BandEdge is essentially a 1 mm PVC sealing edge strip that not only protects the substrate edge but at the same time creates the desired sense of realism as it matches with the overall surface. Technically created to resist scratch, have strong UV adhesion, and have good anti-yellowing performance, BandEdge is presented in 23 mm, 30 mm & 45 mm widths. BandEdge can be machined easily with standard carpenter’s tools.

TECHNICAL PARAMETERS OF THE PRODUCT

- PVC sealing edge strip has better resistance to heat, chemicals, and abrasion. It also gives wood grains, textiles, and other patterns of realism in three dimensional sense.
- Trim edges without whitening, and it is easy to paste.
- Environmentally friendly and safe materials are used. The product passes every SGS test. It has high UV adhesion, good scratch resistance, good elasticity, is difficult to deform, bends without turning white, and is difficult to fall off. It also has strong UV protection and anti-yellowing properties.
- The high PVC content in BandEdge ensures the best quality of the base material while also ensuring non-whitening after trimming.
